

TS-FHT- 400

Introduction:

Full height turnstiles are floor-to-ceiling turnstiles with mechanical rotating barriers. They operate similarly to a revolving door with the only difference being that they allow access to one person at a time by locking after a single person makes entry into the system.

Full height turnstiles are built to stop tailgating at the exterior of your facility. While they completely shut down any attempts at tailgating, they are not able to prevent piggybacking. Full height turnstiles are cost-effective and tend to have a lifespan of 25+ years.

We provide models in stainless-steel 304 and 316. They can be powder coated to your preference and can also be motorized, full waterproofed and weatherproofed

Application:

School/College

Airport

Metro

IT Companies

Government Offices

Factories

Access Control System(Optional)

Swipe Card

Access is controlled through authorized swipe cards, ensuring secure, reliable, and efficient entry management.

Iris Recognition Access

Secure, contactless entry using unique eye-based identification for high-level safety and fast access control.

Fingerprint Recognition Access

Secure entry using authorized fingerprint authentication for fast and reliable access control.

Coin / Ticket Access System

Entry is allowed using a valid coin or ticket, providing a simple and controlled access solution for managed entry points.

Face Recognition Access System

Secure and contactless entry using authorized facial identification for fast and reliable access control.

Manual Operation

Gate can be opened manually using wired or wireless controls for convenient entry management.

Features:

Reliability

The Technospacio Full height turnstiles features a durable alloy steel flap hub and SUS 304 stainless steel construction for long-lasting performance. Its energy-efficient electromagnetic locking system, self-lubricating compact mechanism, and high-quality electrical components ensure reliable, smooth, and maintenance-friendly operation.

Safety & User-Oriented Design

The Technospacio Full height turnstiles ensures safe and convenient access with anti-pinch protection, smooth flap operation, and clear LED direction indicators. Its user-friendly design supports seamless integration with RFID, biometric, face recognition, and QR code access systems.

Easy Integration

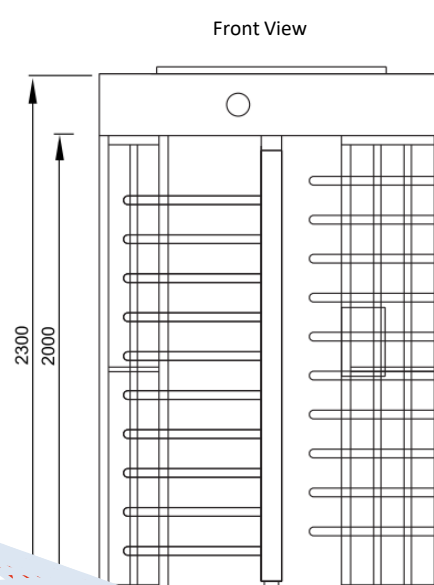

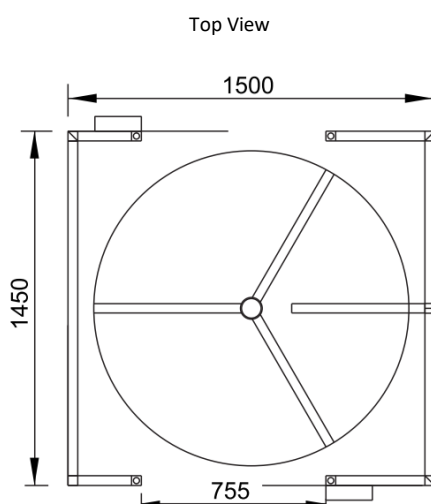

The Technospacio Full height turnstiles is designed for seamless integration with third-party access control systems. Its flexible reader mounting options, standard electrical interfaces, and spacious internal design enable quick and efficient installation of RFID, biometric, QR code, and other authentication devices.

Integration Service

Technospacio provides factory-level integration services with all boards and peripherals pre-installed, ensuring full system compliance and reliability. The turnstile is delivered ready for use—just plug in and complete the setup. This simplifies installation and helps reduce overall installation costs.

Dimensions (mm):

Specifications:

Brand Name	TECHNOSPACIO
Model Name	TS-FHT-400
Dimensions	1500× 1450 × 2300 mm + 500 mm Arm Length
Material	SUS 304 (SUS 316 Optional)
Material Thickness	Top cover1.2mm+body 1.5mm
Passage indicator	Soft LED indicator light on top + Door
Operating Environment	Indoor/Outdoor (Covered)
Power rate	60W
Power Supply	AC 110–220V, 50/60Hz
IP rating	IP 54
Drive Mechanism	Semi-Automatic Electromagnetic Mechanism(Full-Automatic Brushless Motor Optional)
Traffic Direction	Configurable for Unidirectional or Bidirectional flow
Control Signal	Relay contact signal (dry contact)
Operating Temperature	-28°C to +70°C
Passage Speed	25–48 persons/ per minute
MCBF	Electromagnetic Mechanism: Up to 5 Million Cycles Brushless Motor (Optional): Up to 8 Million Cycles
